***Argument Against Measure V - Monterey Peninsula Community College
District Affordable Higher Education Measure***

Monterey Peninsula College is being financially irresponsible. They should not tax **you** hundreds of dollars a year more during the worst economy in our nation's history.

We have lost jobs, businesses have closed, and our area is facing a future avalanche of foreclosures and evictions. MPC does not need this bond right now, they can wait until we **ALL** recover from this pandemic.

Their \$230 million dollar bond has a final cost with interest of \$451,000,000!
Almost half a billion dollars!

Our national debt has soared from \$10 to \$30 Trillion dollars, California is broke and will be looking to we the taxpayers for a bail out. Inflation has soared. The Monterey Peninsula Taxpayers Association works to keep families from losing their homes and ensuring their tax dollars are spent properly and prudently. We urge you to vote **NO** on all new taxes.

Please say to them, **ENOUGH IS ENOUGH!**

We must live within our budgets, MPC needs to do the same.

During the worst pandemic in our history, our families need to survive, both with health and financially.

Just say **NO** new taxes!
